## Settle CE (VC) Primary School Global Learning Vision Statement

Settle Primary School is committed to promoting and demonstrating a global learning dimension in all its various activities and endeavours that constitute “the school” to ensure that all pupils are encouraged to -

- be independent thinkers who question before making judgements;
  - be active and caring members of society;
  - be equipped to make sound decisions and solve problems;
- consistently and regularly be aware of and sensitive to the global dimension in their studies and school activities;
- show concern for the local and worldwide environment and issues and how and where they are linked;
  - recognise and respect the diverse and different needs of people throughout the world, while acknowledging the similarities we all share despite social and resource inequalities.

*This vision statement is supported and celebrated by all who form part of the learning environment of the school. Global education is an ethos: it runs through all the curriculum areas, and through wider school life. Hence it is a curriculum dimension, an educational philosophy and a way of life! It pervades everything - informing, enhancing and challenging all that is done in school.*
