

Finding how many

A counting and grouping activity

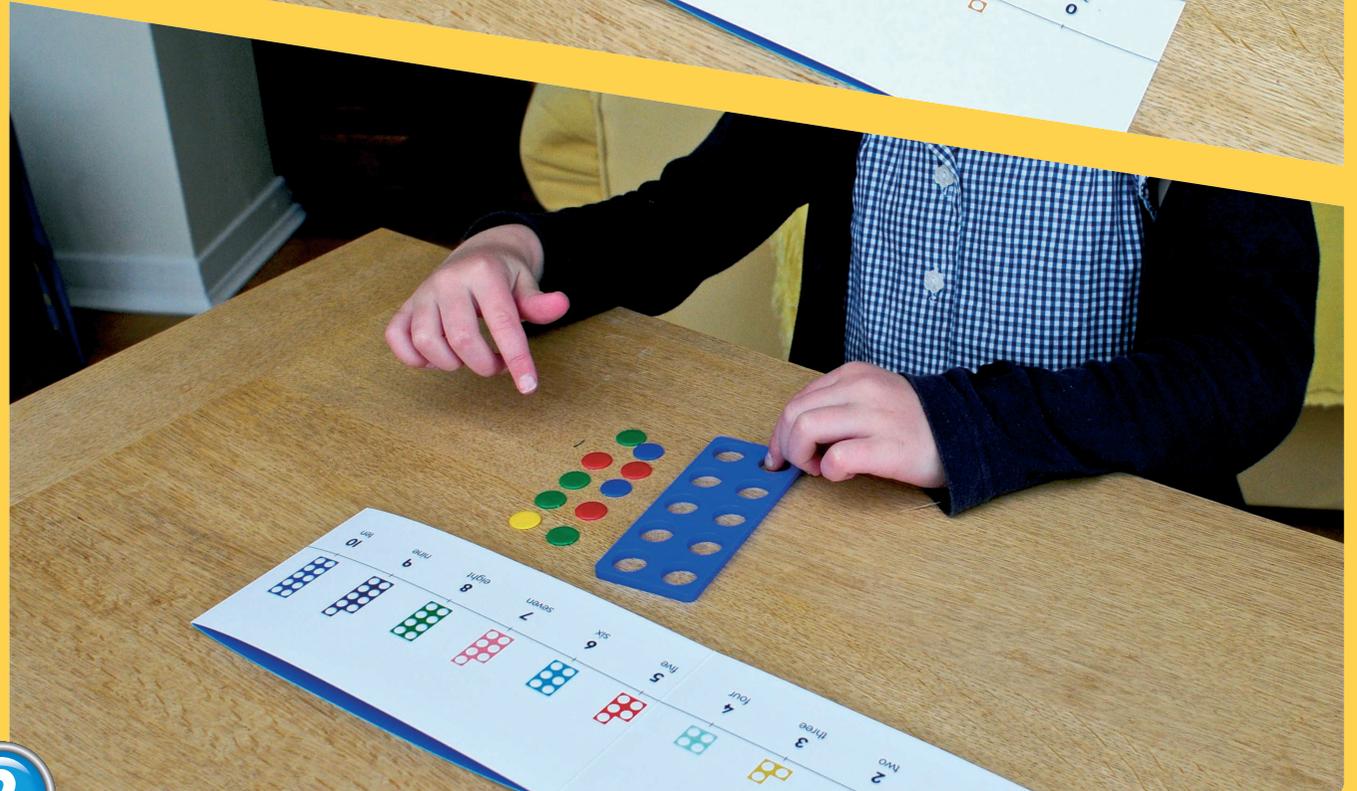

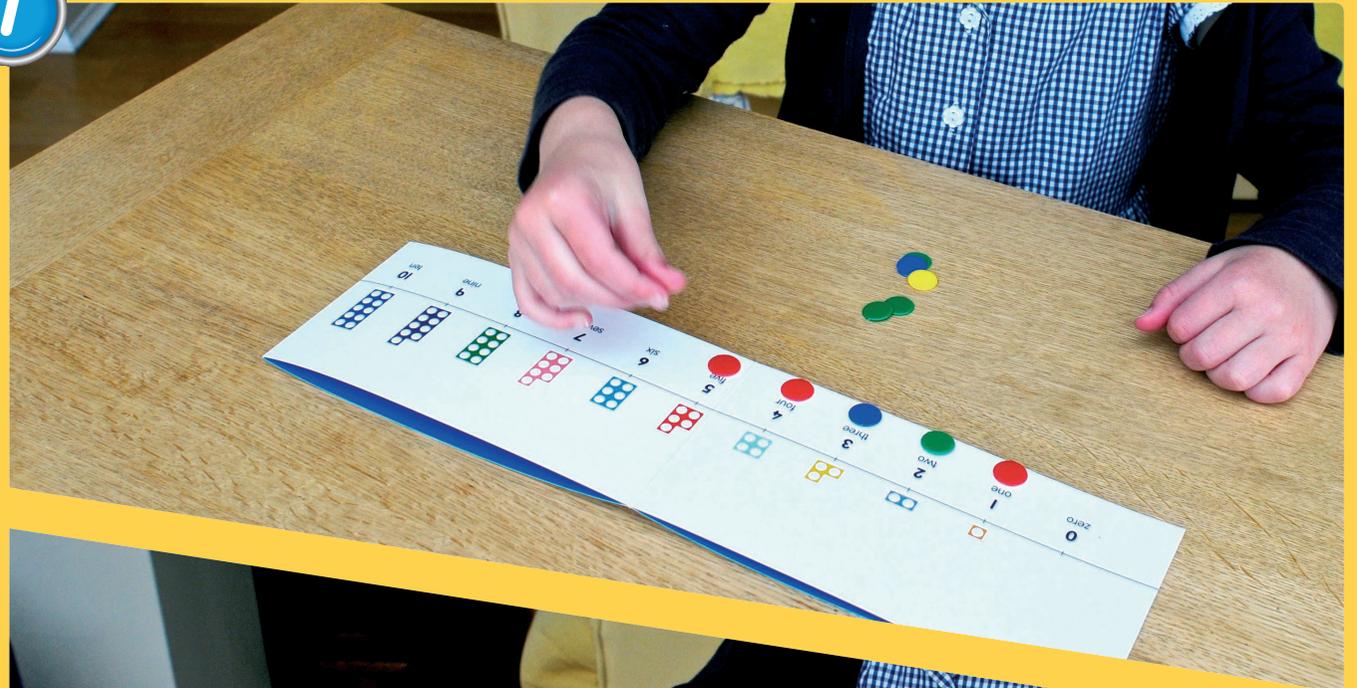

What you will need...

- Numicon Number Line
- Counters
- Numicon Shapes 1-10

What to do...

- Give your child between 1 and 10 counters, and ask them to place them along the Number Line and say how many counters they have. **photo 1**
- Ask your child to take the Counters off the Number Line and arrange them into the Numicon Pattern.
- Check by finding the matching the Numicon Shape and placing it on top of the Numicon Pattern made with counters. **photo 2**
- Continue with different quantities of counters.
